WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2005/000139

Box No. I Basis of this opinion
 With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under
Rules 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
a. type of material
a sequence listing
table(s) related to the sequence listing
b. format of material
in wirtten format
in computer readable form
c. time of filing/furnishing
contained in the international application as filed.
filed together with the international application in computer readable form.
furnished subsequently to this Authority for the purposes of search.
3. In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been
filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that
in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:
4. Additional comments.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2005/000139

Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

Statement		
Novelty (N)	Claims 1-2	YES
	Claims NONE	NO
Inventive step (IS)	Claims 1-2	YES
	Claims NONE	NO
Industrial applicability (IA)	Claims 1-2	YES
	Claims NONE	NO

2. Citations and explanations:

Reference is made to the following document:

D1: WO 03/102098

1. Novelty and Inventive Step

D1 discloses a communication system improving performance of detecting a signal having indication of a request to change communications states by making at least two positive identifications of the request in a given time frame.

However, D1 does not reaveals the idea of sensing faults of application programs in a CDMA system.

Moreover, It seems not obvious to derive the said idea from D1.

Therefore, novelty can be acknowledged for claims 1 - 2, also these claims involve an inventive steps.

2. Industrial Applicability

Claims 1 - 2 meet the criteria set out in PCT Article 33(4).
